

Proform Intruder MI Range

The latest technology in Soft Candy processing. 1 machine with **4 functions**:

- **cooling, crystallizing, mixing in ingredients** and inline extrusion to downstream forming.

Extruder GE Range

Our extruders are in production worldwide forming bubble gum or soft chews...

- Our extruder ensures regular and efficient shaping of the ropes to increase the efficiency of the downstream equipment.

Co-Extruder GE Range

For 2 color products

A Proform Co-Extruder can extrude:

- different color splits at the same time.
- & produce single color products and 2 color ones simultaneously.

Ball Former BF 1002

Shape a solid or a hollow product rope, with a semi-liquid or powder filling, into a variety of spherical shapes, from balls to eggs or pears...

- The same Ball Former can shape both mini up to mammoth sized products.
- For chewing gum, grained chewy candy, hard candy, plastic or feed type products.

Cooker Extruder KE Range

Licorice or fruit gum: cook, mix, dehumidify and extrude laces or bites, wound wheels, filled **cables** or twists... in single or multiple colors.

- With or without **different kinds of fillings**.
- Self-cleaning system for simple, quick product changeovers.
